

Weigh Station

Automatic or Semi-Automatic Loading

Accurately weigh cases in real time as they are being packed on a Combi Ergopack Hand Pack Case Indexing Station or 2EZ pack station. The *Weigh Station* provides a cost-effective alternative for applications where checking weights prior to case sealing is important. The weigh station can be integrated with a print and apply labeler to display the contents of that particular case.

FEATURES:

- Measure by *Weight –Or- Product Count*
- Includes Model GSE WMC1562-V1S Multitasking Indicator with Stainless Steel NEMA 4X Wash down Housing
- Programmable Data Registers to Store Defined Information
- Industrial Grade Load Cells
- Units of measure in lb/kg
- Non-Volatile Memory Backup
- Backlit 8 Line 40 Character LCD Graphic Display

BENEFITS:

- Allows the line operator to accurately pack the right amount of product into the case without costly product giveaway
- Flexible Configurations offered by Combi – Weigh product before packing into case or after product is packed and on its way to the Sealer
- Easy to operate and maintain
